

## Suggested naming convention for RECOVER web services

The following naming convention applies to the name given to the web service (WCS) in preparation for ingestion into the NASA iRODS grid server (please note the exact name including capitalization and the use of underscores).

### Vegetation dataset services

BPS\_BioPhysicalSetting  
ESP\_EnvironmentalSitePotential  
EVC\_ExistingVegetationCover  
EVT\_ExistingVegetationType

### Fire dataset services

FRCC\_PercentDeparture  
FRCC\_Class  
HistoricFires  
HistoricFires\_PastDecade

### Topographic dataset services

Topography\_Elevation  
Topography\_Aspect  
Topography\_Slope

### Other dataset services

Geology  
Soils\_Texture  
Soils\_Kffactor  
Wetlands  
Watersheds  
SMA\_SurfaceManagementAgency

\* The source data for these services are raster GeoTIFF files, projected into an agreed upon/consistent UTM zone using WGS84.
