

RECOVER Briefing

NASA RECOVER
2015 NBAER Meeting
February 4th, 2015
NIFC, Boise, Idaho

What is RECOVER?

- RECOVER: Rehabilitation Capability Convergence for Ecosystem Recovery
- NASA Applied Sciences Program sponsored project

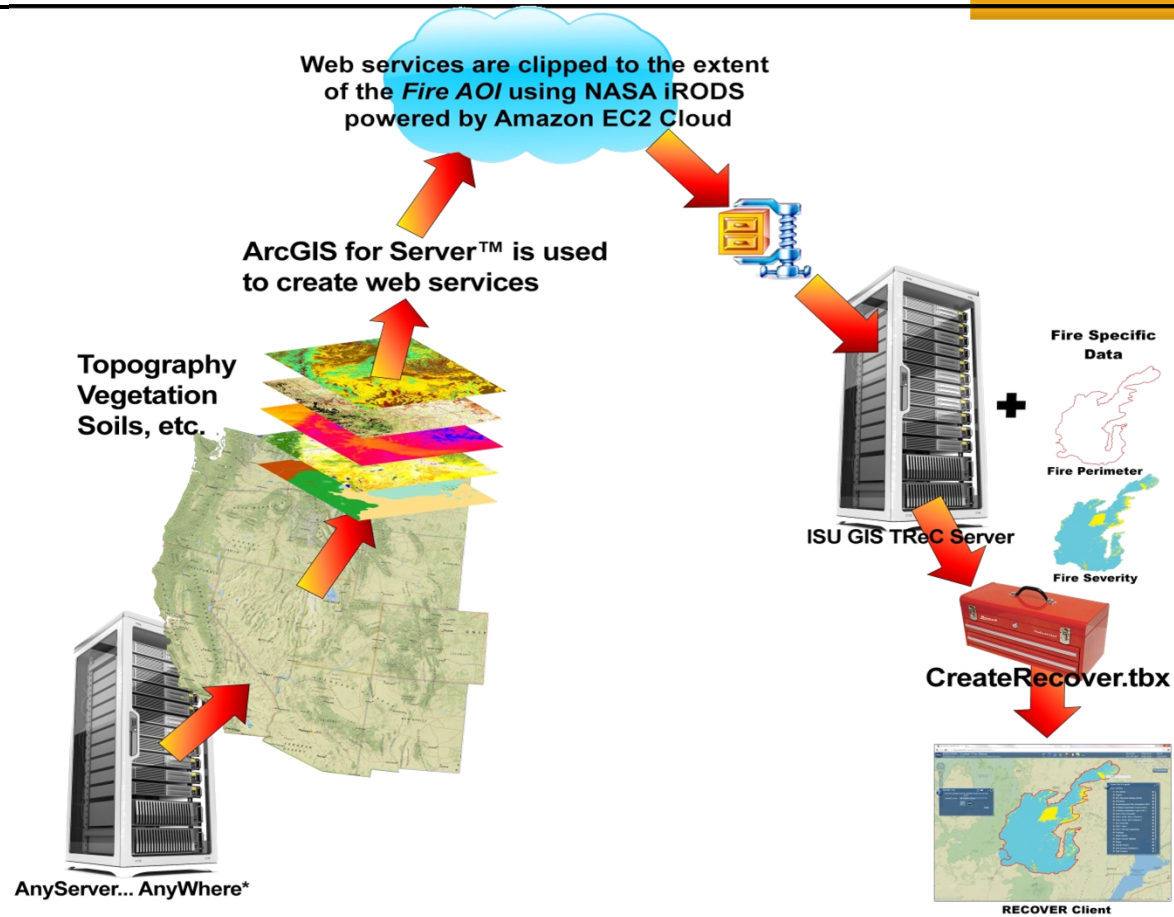

What is RECOVER?

- Customer-driven, Customer-centric*
- Decision Support System (DSS)
 - Rapid assembly of site-specific data
 - Delivered in a customized GIS analysis environment
 - Wildfire focus

* Our “customer” is the USDI BLM, Idaho Dept. of Lands, National Park Service, USFS, and other wildfire management agencies

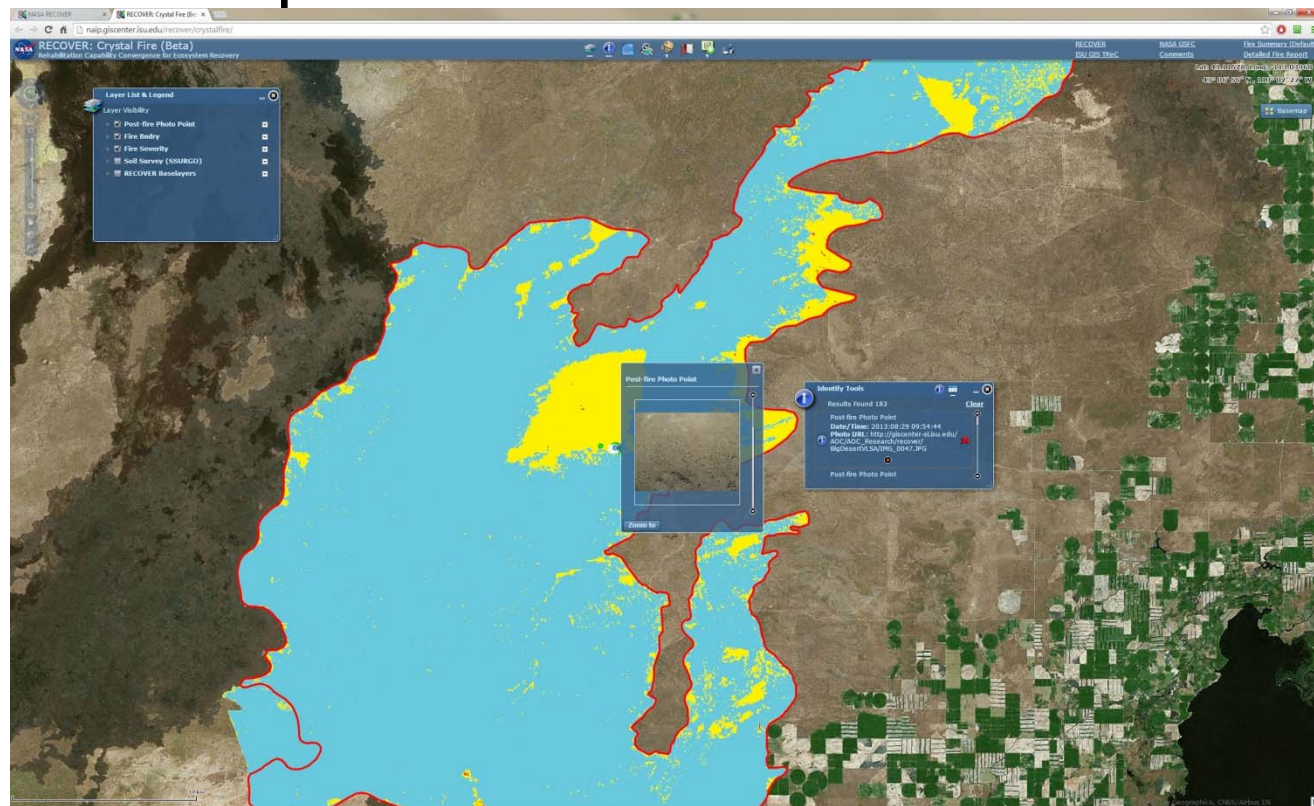

How Does it Work?

Web Map RECOVER Client

- User requirements...a web browser

IDAHO
STATE
UNIVERSITY

Features of the Web Map

- Rapid display of geospatial data
- Users can:
 - Turn on/off layers of interest
 - Query layers (vector or raster)

Standard/Base Layers

Vegetation dataset services

- BPS_BioPhysicalSetting
- ESP_EnvironmentalSitePotential
- EVC_ExistingVegetationCover
- EVT_ExistingVegetationType
- fPAR
- NDVI

Fire dataset services

- FRG_FireRegimeGroup
- HistoricFires
- HistoricFires_PastDecade

Topographic dataset services

- TopographyElevation
- TopographyAspect
- TopographySlopeDEG

Other dataset services

- Geology
- Habitat
- LandslidePotential
- NHD
- ROADS
- SMA_SurfaceManagementAgency
- Wetlands
- Watersheds

* The spatial reference system for these data and resulting services is USA Contiguous Albers Equal Area Conic USGS version, NAD83, WKID: 102039

Data Sources

- RECOVER produces web services from *your* data

RECOVER and the TEUI?

The Terrestrial Ecological Unit Inventory (TEUI)

Geospatial Toolkit

Version 2

- Use RECOVER data services for advanced analysis within TEUI and ArcMap

Features of the Web Map (cont'd)

- Users can:
 - Launch ancillary data (e.g., photos)
 - Open/download reports

Available Reports

- Basic fire summary
- Detailed Fire Report
- Ecological Type

Summary of burned Acres by land agency

AGENCY_NAME	SUM_Acres
BLM	200475
PRIVATE	12183
STATE	4793
NPS	2596

Integrate Real-time Data

- The RECOVER real-time service is part of the web map

FireLines

- Aerial Hazard - Solid Red line
- Air Tanker Foam
- Air Tanker Retardant
- Completed Dozer Line
- Completed Line
- Completed Line Break
- Explosive Line
- Fire Spread Prediction
- Hand Line - Solid black line
- Heat Line (IRIN)
- Helitanker Foam
- Helitanker Water
- Other
- Planned Fire Break
- Planned Fire Line
- Planned Secondary Line
- Flow Line
- Proposed Dozer Line
- Ridge / Geographic Feature
- Uncontrolled Fire Edge
- Unknown

AssignmentBreaks

- Sector
- Division
- Branch
- Zone

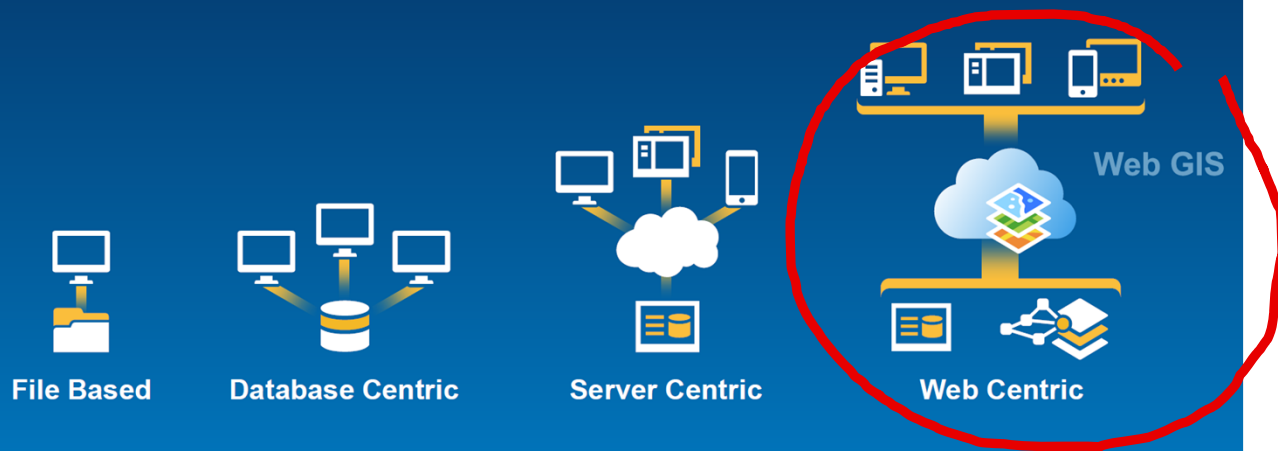

FirePoints

- Aerial Hazard
- Airstrip or Airport
- Camp
- Drop Point
- Fire Origin
- Fire Station
- First Aid Station
- Heat Source
- Heat Source - Outside of Line
- Helibase
- Helispot
- Hot Spot
- IR Downlink
- Incident Base
- Incident Command Post
- Lookout
- Miscellaneous
- Mobil Weather Unit
- Mud Pit
- Repeater
- Retardant Pickup
- Safety Zone
- Spot Fire
- Staging Area
- Telephone
- Unknown
- Water Source
- Wind Speed

Benefits of RECOVER

Leveraging Common Computing Architecture

- Works seamlessly across all devices
- Reduces need for custom applications
- Platform for integration with other business systems
- Cross organizational collaboration
- Ready to use content and services
- Content management system

IDAHO
STATE
UNIVERSITY

Future Plans for RECOVER

- Over the next few years we will...
 - Operationalize the RECOVER DSS (currently beta)
 - Expand the spatial coverage area to include the entire Western US
 - Expand to new partner agencies

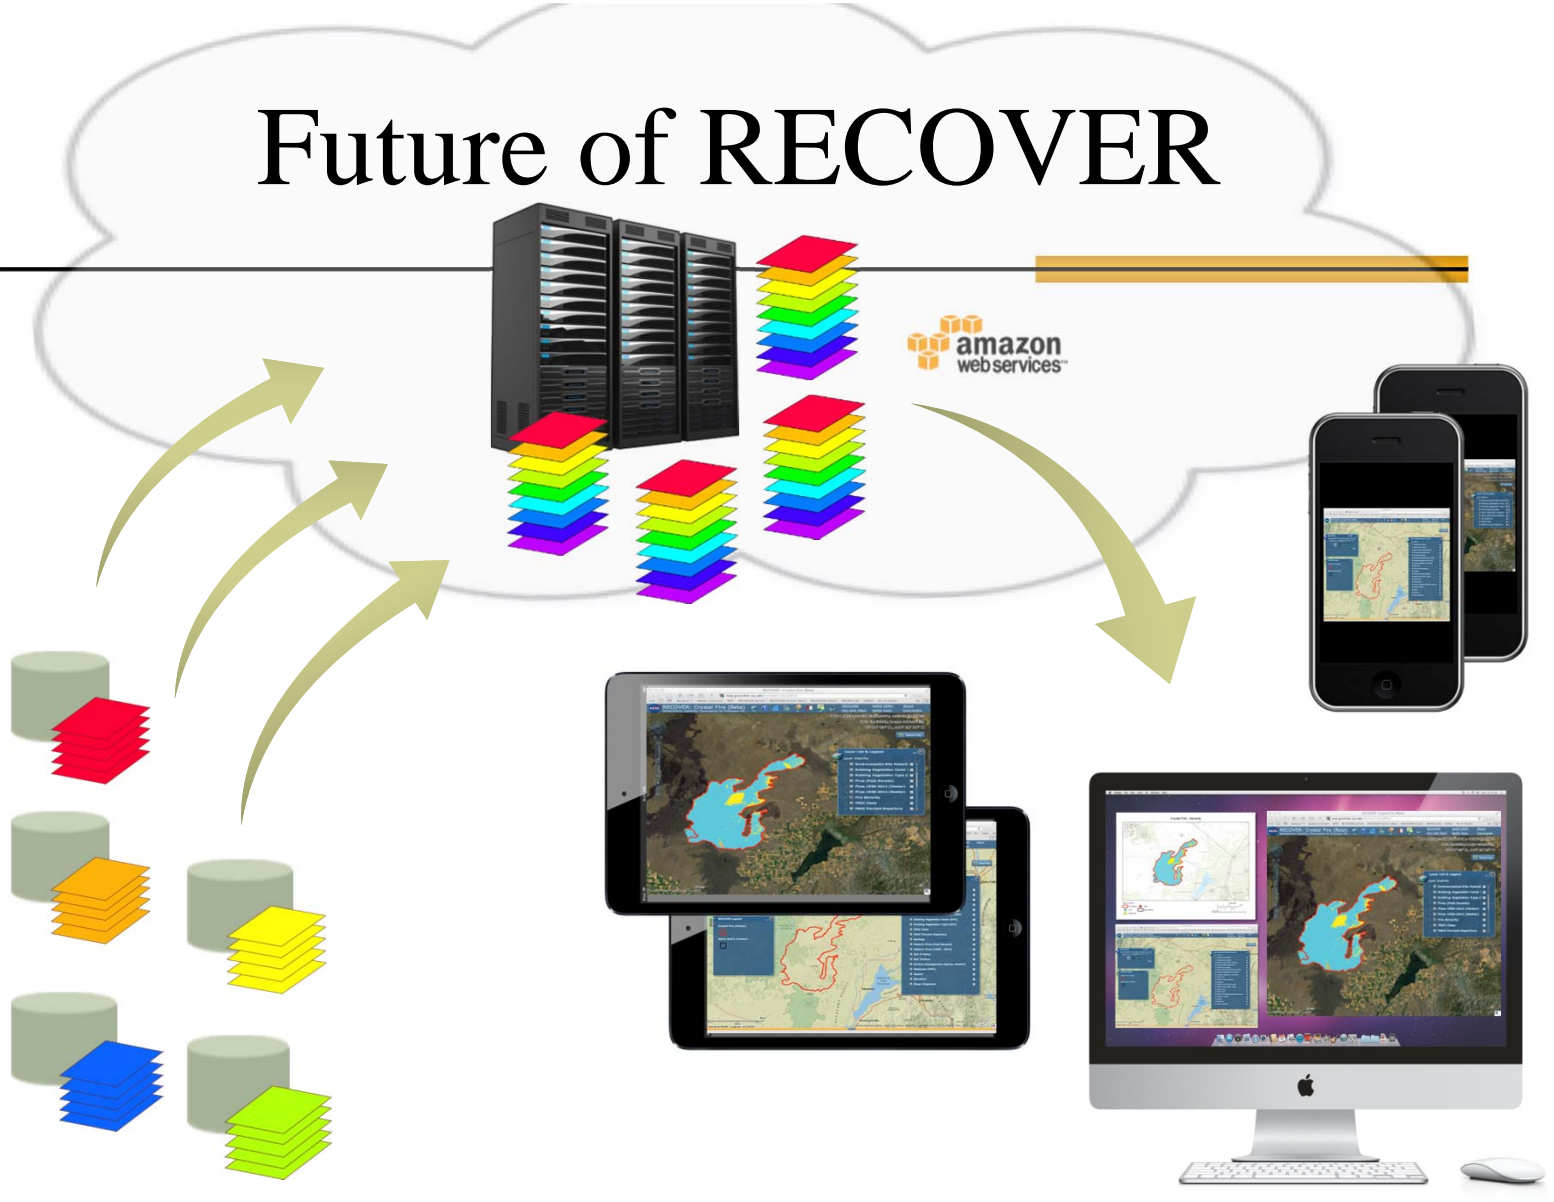

Future (cont'd)

- Develop long-term monitoring
- Incorporate new data products:
 - SMAP
 - Research results from NASA DEVELOP
- Further increase RECOVER's performance and responsiveness

Future of RECOVER

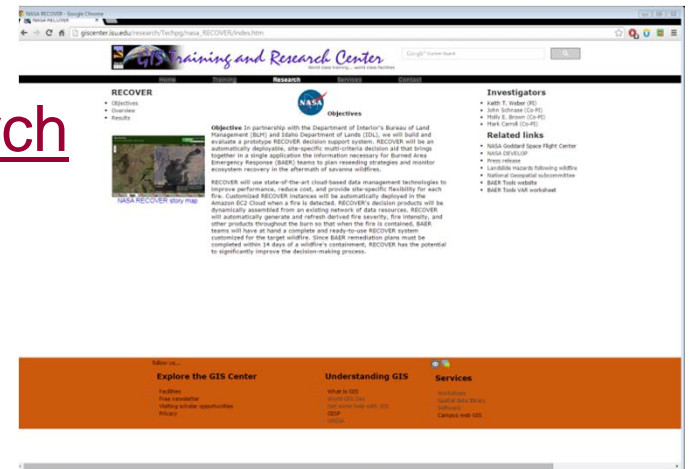

There's More...

- Visit the RECOVER project website:

http://giscenter.isu.edu/research/Techpg/nasa_RECOVER/

- Click Results
- Test drive a demo webmap
- Connect to our services and use RECOVER data in ArcMap on *your* desktop
