

## Suggested naming convention for RECOVER web services

The following list describes the RECOVER base layers available to our partners along with the standard naming convention applied to the web services hosted at ISU's GIS TReC (please note the exact name including capitalization and the use of underscores).

### Vegetation dataset services

BPS\_BioPhysicalSetting  
ESP\_EnvironmentalSitePotential  
EVC\_ExistingVegetationCover  
EVT\_ExistingVegetationType  
fPAR  
NDVI

### Fire dataset services

FRG\_FireRegimeGroup  
HistoricFires  
HistoricFires\_PastDecade

### Topographic dataset services

TopographyElevation  
TopographyAspect  
TopographySlope

### Other dataset services

Geology  
Habitat  
LandslidePotential  
NHD  
Roads  
SMA  
Soils\_SSURGO  
Soils\_STATSGO  
Soils\_STATSGO\_KFactor  
Watersheds  
Wetlands

\* The spatial reference system for these data and resulting services is USA Contiguous Albers Equal Area Conic USGS version, NAD83, WKID: 102039
