Hello,

Despite the more difficult situation we currently find ourselves in, here at ISU's GIS TReC we continue to make progress on our lidar support efforts for the state. We continue to work with the Idaho Lidar Consortium and you will likely see a revised website from ILC in the near future.

We have recently completed a second new web map describing the current lidar collections in progress.

<https://isu.maps.arcgis.com/home/webmap/viewer.html?webmap=0dbf98b1c1ed44029dde9ea8d2d7f2ea> These large collection areas will be completed and delivered as indicated in the layer's attribute table (visible in the pop-up).

We are also planning a hands-on lidar workshop over the summer. This workshop may need to be delivered as a webinar but should still provide very beneficial and helpful training for you. If you are interested in our upcoming lidar workshop please let me know and please provide an idea of when you would like to see the workshop offered.

Take care.

*Sincerely,***Keith T. Weber**
