Hello

Lots of good stuff happening in the world of Lidar here in Idaho. Our "Working with Lidar in ArcGIS Pro" workshop was successfully completed on Friday August 7th. I am planning to offer another lidar workshop in October or November and if you would like to attend please let me know (I already have a growing waiting list) and cast your vote for either an October or November date. Here are the choices

**Thursday October 15th****Thursday October 29th****Thursday November 19th**

This will be a full day workshop offered via Zoom.

We also learned about some additional Lidar that has been collected by NASA. We have downloaded these data and are reviewing and processing these projects. We hope to have these added to our servers in the next few weeks!

The large Lidar collection in southern Idaho supported by FEMA is moving along very well and it appears that the central Idaho earthquake epicenter region has already been collected.

If you have a project area you would like have collected with lidar, visit the Idaho Lidar Consortium and our lidar wish-list map at <https://www.idaholidar.org/> Don't forget to add your contact information when posting a proposed collection site!

*Sincerely,*

**Keith T. Weber**
