Hello

We have not seen any new lidar deliveries for over the past month but like many of you we are anxiously awaiting the 2019 southern Idaho lidar. This represents a large number of individual projects and Counties roughly listed under the general name "southern Idaho". The next project we see should be a large area over the Big Desert, just east of Craters of the Moon.

You may be interested in attending our next TECH talk which focuses on the 3D National Topography Model. This presentation will be on Thursday August 25th at 11:30am MT. The link to connect is:

Introducing the 3D National Topography Model
