Hello

Earlier this week we received five new Idaho Lidar project areas. These are all part of the Southern Idaho 2018-2019 collection and are named #1, #2, #6, #14, and #15. The largest of these collections cover areas along the Snake River from roughly Twin Falls to just east of Boise.

We are downloading all these data (over 10,000 tiles) and processing these as I write this. I am hoping to get at least some of these out on our server by the end of next week (Friday the 25th).

If you have any questions just let us know.

Sincerely,

Keith T. Weber
