Hello and Happy Holidays,

Our "Working with Lidar in ArcGIS Pro" workshop went very well with nearly two dozen participants completing the full-day online workshop. I will be offering this workshop again in the New Year, so watch your email for this announcement.

Part of that workshop included using Globus to download the workshop exercise and thereby gain experience using Globus. As it turns out, this process may have been the most difficult part of the entire workshop and it prompted me to make a quick video on setting up Globus connect personal. Here is a link to our YouTube channel and this video <https://youtu.be/46hR9W6R6JM>

I see there is an Elevation TWG meeting on Friday the 18th from 11-noon MT. Contact Josh at the ILC for details ([joshenterkine@boisestate.edu](mailto:joshenterkine@boisestate.edu)).

Take care.

*Sincerely,*

**Keith T. Weber**
