Hello and Happy Holidays to you

We continue to make improvements to our lidar data for Idaho and since the last Idaho Lidar News, we have completed some internal reorganization of the files on our servers and updated the Idaho Lidar Web Viewer to reflect this.

We are also making very good progress on a revised and improved pitfall process as well as digital surface model (DSM) or top of canopy processing. If you would like to review some of our test DSM layers just let me know.

Our Lidar workshop for January 2025 has filled. If you would like to attend our free full-day lidar workshop in the future (early summer 2025) please let us know and I will be sure to add you to our waiting list.

Take care and enjoy the holidays ahead.

Sincerely,

Keith T. Weber, GISP
