Hello Geo-list

As some of you may know, we are very involved in lidar for Idaho here at Idaho State University's GIS TReC. We have worked with and continue to work with the Idaho Lidar Consortium (ILC) to bring lidar data to the GIS community of Idaho. Today, I would like to let you know about some exciting lidar events happening right now.

The GIS TReC@ISU continues to host both raw (las) and processed Lidar data, delivering all these data as quickly as possible using Globus Online large file transfer. I am happy to report that new Teton county lidar data is now available! These data cover the entire county at QL1.

Second, following our *Working with Lidar in ArcGIS Pro* workshop earlier this month, I released a recorded segment covering an introduction to Lidar. Check it out at <https://youtu.be/FwCn2es1VK0>

To learn more about this project, visit http://giscenter.isu.edu/research/Techpg/FEMA_DOS/index.htm

Sincerely,

Keith T. Weber
