Good news Idaho GIS'ers

We have more lidar data available now. Early this morning I finalized updates to our servers and web maps to allow easy access to the newest collection, Southern Idaho 2018 #21. This area is in western Idaho and primarily covers parts of northern Owyhee county. You can access this and all lidar data for Idaho by visiting <https://isu.maps.arcgis.com/apps/instant/media/index.html?appid=796225ca9c9f4c07a1288225ed1afd30>

NOTE: new collections are shown in orange.

I also want to let you know about two FREE lidar workshops coming up in May. I will be teaching Working with Lidar in ArcGIS Pro on Wednesday May 8th and Lidar Applications/Spatial Analysis on Thursday May 9th. Both are full-day, hands-on workshops that can be completed in-person or online. For full details or to register please visit <https://giscenter.isu.edu/Workshops/index.htm>

Sincerely,

Keith T. Weber
