Hello

Since the last Idaho Lidar News email we have just started downloading three new lidar project areas. They are named Southern Idaho 2018 #13, #22, and #23. Each of these will help us round out the southern Idaho collection and fill in areas current devoid of lidar. I hope to have all these completed and uploaded to our server in just a few weeks. We are working on these in numeric order.

I wish I had a screen shot to provide you but unfortunately do not as we are currently downloading these data.

The FREE lidar workshop has filled and I will be offering another workshop in the spring or early summer. If you have a specific time frame when you would like to see this workshop offered please let me know.

Sincerely,

Keith T. Weber
