Hello

I hope 2025 is going well for you. We have some news and updates for you regarding Lidar!

1. All bare earth DTM data for Idaho has been processed through a new pit fill spatial statistics tool. These data are available using our Instant Download capability enabled on the Idaho Lidar Web Viewer... click the second page of the pop-up and simply download the zip file for your AOI. Here is a link to the web map app: <https://isu.maps.arcgis.com/apps/instant/media/index.html?appid=796225ca9c9f4c07a1288225ed1afd30>

The zip file will contain the standard DTM + the pit filled DTM.

2. We completed a successful lidar workshop last week and are now gearing up for the next series of workshops later this year. I am looking at mid-May through mid-June. If you have any preference for our next Lidar workshop dates, please let me know.

If you have any questions or ideas to help improve our lidar services, please let me know. Take care and have a good day.

*Sincerely,*

### Keith T. Weber, GISP
