Hello,

We now have more lidar data available for Idaho. The update includes southern Idaho 2018 data for project areas #3, #7, #8, and #11. But a picture is worth a thousand words, right? And a map is worth a million words! Check out the updated Idaho Lidar Web Viewer at <https://isu.maps.arcgis.com/apps/instant/media/index.html?appid=796225ca9c9f4c07a1288225ed1afd30>

Our lidar image service has also been updated and with it, you can stream in the bare earth topographic data and bypass downloading the data. Our bare earth elevation data has been pit filled and also contains raster templates for aspect, slope, and other functions. Here is a link to this lidar image service <https://isu.maps.arcgis.com/home/item.html?id=1b64a215d2e64d6690b52496e041df59>

Sincerely,

Keith T. Weber
