Hello

Over the past few weeks we have made additional progress on lidar datasets for Idaho. Specifically, we have acquired some new raw data provided by the USFS Rocky Mountain Research Station in Moscow Idaho. These LAZ files are currently being reviewed and converted to LAS to make working with these data more convenient for many of our users.

Unfortunately, our lidar server is undergoing some maintenance/updates and is currently offline at this time. As soon as it is back online, I will upload these new data for central/northern Idaho. This should be completed next week or early in August. Thank you for your patience.

Sincerely,

Keith T. Weber
