Hello

I am happy to report additional progress has been made to build our lidar resources for you and all of Idaho. We have recently updated our website and hope it is a bit more user friendly (https://giscenter.isu.edu/research/Techpg/FEMA_DOS/index.htm), we have also added a help document inside each and every folder on our lidar server. My hope is that you won't be able to miss our notes and helpful tips.

We are also acquiring new lidar data through the USGS and hope to have some additional datasets added in the near future. I will be sure to report on this in our next newsletter.

Lastly, I am very happy to let you know that our Idaho Lidar Web Viewer has been updated to include a good search tool and a much nicer appearance, check it out at <https://giscenter.isu.edu/styler/?appid=163bf5887aa04f308a15fe8e44963bf8>

Sincerely,

Keith T. Weber
