Hello

Here at ISU's GIS TReC we continue to work closely with the Idaho Lidar Consortium on all things lidar for Idaho. We continue to produce some value-added pitfilled lidar surface/elevation data and over the past month we have completed this for the Payette National Forest 2012 collection and the Musselshell 2011 collection. These data are available for download through the Idaho Lidar Web Viewer <https://giscenter.isu.edu/styler/?appid=163bf5887aa04f308a15fe8e44963bf8>

We expect to have a large number of additional pit-fill projects completed over the next few weeks and I look forward to reporting on this next month.

I will be teaching Lidar workshops early next week and if you would like to get on our waiting list for the next set of classes please email me and let me know.

Sincerely,

Keith T. Weber
