Hello Geo-list,

I am pleased to report that some new lidar data is now available in northern Idaho and was provided to us by the Nez Perce Tribe. Look for the orange highlighted polygon areas in our Idaho Lidar Web Viewer here <https://isu.maps.arcgis.com/apps/instant/media/index.html?appid=796225ca9c9f4c07a1288225ed1afd30>

These data have also been added to the lidar image service providing you with hydro-flattened and pit-filled bare earth DTM data through a web service (i.e., you do not need to download anything). To connect to this service visit <https://livingatlas.arcgis.com/en/browse/?q=idaho%20lidar#q=idaho+lidar&d=2>

Lastly, our May workshops are nearly full, but there are a few FREE seats available in our May 8th Working with Lidar in ArcGIS Pro workshop. Click here for details <https://giscenter.isu.edu/Workshops/index.htm>

Have a good rest of your day!

Sincerely,

Keith T. Weber
