Hello,

I am happy to report to you this month that we have added 11 new lidar project areas to our server. All of these lidar datasets are found in northern Idaho and include:

1. Coeur d'Alene Tribes 2008
2. USFS Idaho/Montana 2011
3. Clearwater 2011/2012
4. Deception project area
5. Elk project area
6. Kootenai River
7. Laundry/China/Osier project area
8. Musselshell project area
9. Potlatch project area
10. Priest project area
11. and the Walde Placer project area

To review and access these data, visit the Idaho Lidar Web Viewer at <https://giscenter.isu.edu/styler/?appid=163bf5887aa04f308a15fe8e44963bf8>

The lidar elevation image service has also been updated with these new data.

Lastly, I recently learned we should see delivery of some brand new lidar data (collected in 2019/2020) in late summer or fall of this year.

*Sincerely,*

### Keith T. Weber
