Hello GIS'ers,

No real news to report this month other than we continue to wait anxiously and patiently for new lidar data to be released for Idaho. Rest assured, as soon as it becomes available we will make it available to you as well.

The April 19-20th Lidar workshops were successful and I am currently planning to offer additional workshops in July. If you are interested and would like to suggest specific dates for the workshops just let me know.

We also continue to work on development of additional lidar tools and models to help you use these data. We are currently exploring automation tools to detect ladder fuels within forested ecosystems using LAS Tools and ArcGIS Pro. I hope to have more to report on this in the coming months.

*Sincerely,*

### Keith T. Weber
