Hello

I just uploaded 22 new digital surface models for Idaho project areas and we are well on track to have DSMs for all lidar projects areas complete before the end of September (and hopefully, before the end of summer). You can access the DSMs, DTMs, etc using the Idaho Lidar Web Viewer at <https://isu.maps.arcgis.com/apps/instant/media/index.html?appid=796225ca9c9f4c07a1288225ed1afd30>

In June I will be teaching two FREE lidar workshops. I opened registration a week or so ago and a few seats remain. Here are some details:

Working with Lidar in ArcGIS Pro (Wednesday June 11th)

This full day course teaches the fundamentals of lidar, its data structure, and data standards. Participants will learn how to download lidar data from the Idaho Lidar Consortium and the ISU GIS TReC Lidar Web Viewer. With data in hand the participant will build an LAS dataset in ArcGIS Pro, learn how to classify point returns, and create a bare earth raster image (Registration is FREE and sponsored by FEMA).

Lidar Applications and Spatial Analysis (Thursday June 12th)

This full day course teaches the fundamentals of lidar, its data structure, and data standards. Participants will learn how to download lidar data from the Idaho Lidar Consortium and the ISU GIS TReC Lidar Web Viewer. With data in hand the participant will build an LAS dataset in ArcGIS Pro, learn how to classify point returns, and create a bare earth raster image (Registration is FREE and sponsored by FEMA).

For full details and to register, visit <https://giscenter.isu.edu/Workshops/index.htm>
