Hello

I would like to let you know of some changes/updates to our Lidar data collection. First, I have reorganized the Blackfoot Portneuf project. This project was partially delivered in 2017 and completed in 2018 but also had some sub-deliveries in those years. Confusing YES!, so instead of project data being stored in four discrete folders I have reorganized these data into one single folder without loss of any data at all.

Second, we have received a new delivery for the Southern Idaho 2018 project, specifically area #20. This area covers parts of all of Butte, Clark, Custer, Fremont, Jefferson, Lemhi, and Madison Counties.

I am doing my best to get these data out to our server this week.

You can access all these data using the Idaho Lidar Web Viewer at <https://isu.maps.arcgis.com/apps/instant/media/index.html?appid=796225ca9c9f4c07a1288225ed1afd30>

Happy GIS Day!

*Sincerely,*

### Keith T. Weber
