Hello GIS'ers  
Once again we have some updates to share with you regarding lidar in Idaho this month.

We have acquired several new lidar collections from NASA and these have been added to our download server, the Idaho Lidar web viewer, and our lidar web service which allows you to stream bare earth lidar data directly into ArcGIS without any download necessary.

We continue to maintain our **Lidar Collections Progress** web map and you can check out new lidar collection status by visiting <https://arcg.is/1yDH45>

We also want to help you learn about lidar. To do that we will be offering another free lidar workshop in December and would also like to let you know about a YouTube series offered by Virginia Geospatial Extension. You can visit and view this series by clicking <https://www.youtube.com/user/VaGeoExtension/playlists>

*Sincerely,*

### **Keith T. Weber**
