Hello

I may sound like a broken record but we continue to wait for additional lidar data to be delivered for Idaho. The most recent update indicates a large collection north of American Falls Reservoir should be delivered in November or December.

The October 12th lidar workshop, "Working with Lidar in ArcGIS Pro" was successful with 19 students completing this full-day, hands-on workshop. I am planning to offer this workshop again in January along with "Lidar Applications and Spatial Analysis". If you would like to be offered "first dibs" on registering for these free workshops please email me to be added to our "waiting list".

The next Elevation TWG meeting is scheduled for Thursday November 3rd and you should see a reminder from Josh Enterkine as that event draws near.

Sincerely,

Keith T. Weber
