Hello Idaho!

I am pleased to let you know that the Southern Idaho collections for areas #1, #2, and #6 are now complete and fully accessible on our server through the Idaho Lidar Webviewer (<https://isu.maps.arcgis.com/apps/instant/media/index.html?appid=796225ca9c9f4c07a1288225ed1afd30>). We have symbolized these new collection areas with an orange color to help you find them.

Areas #14 and #15 are partially completed and should be fully available by the end of next week or early October.

I am also happy to let you know that we now have new Lidar data for Latah and Lewis Counties. These data are also partially uploaded to our servers and should be 100% completed in the next few weeks.

If you have any questions or need some help, just let me know.

*Sincerely,*

### Keith T. Weber
