Hello

The NASA RECOVER post-wildfire decision support system transition to the USDA Forest Service GTAC is complete. Please visit <https://www.arcgis.com/apps/dashboards/68f43718f2474f369c587a97d32cd0cf> and use RECOVER from this site. It has the capabilities of RECOVER 2.0 on the ISU GIS TREC servers plus it is poised to continue service for the wildfire community well into the future.

A big shout out of thanks goes to my colleagues at GTAC for their work on this transition with us. This is a good team!

If I can be of help to the wildfire community in the future, feel free to email me directly at webekeit@isu.edu

Sincerely,

Keith T. Weber, GISP
