Hello,

The RECOVER DSS is currently tracking 99 wildfires burning or having occurred in 2024, including the Cow Valley megafire. If you need any help accessing or working with RECOVER just let me know. To help get you started a great starting point is our dashboard at <https://www.arcgis.com/apps/dashboards/19af90a8bc5d41188ed855d249bc1c72>

We recently updated our Long-term NDVI monitoring tool in response to changes in ArcGIS Pro 3.3.1. The update notes are available here https://giscenter.isu.edu/pdf/PDF_NASA_RECOVER2/geemapNDVItool_update20240715.pdf

We are also progressing toward transitioning the RECOVER platform to the USDA Forest Service GTAC servers and hope to have this process completed before the end of the calendar year.

If you have any questions or ideas to improve RECOVER just let us know. Take care and have a great rest of your week.

Sincerely,

Keith T. Weber
