To: Geo-list IDAHO <geotech@admws.idaho.gov>

Good news this month. Since my last update newsletter we have reviewed and prepared 11 new LAS collections provided by the USFS. Each of these are found in northern Idaho and can be accessed by pointing your Globus connection to https://app.globus.org/file-manager?origin_id=03bed01a-e124-11e7-802a-0a208f818180&origin_path=%2Fraw%2FNorthern%2FIDL2019%2F

You may wish to download the entire project in one LAZ file or choose individual project LAS files referenced in the Tile Reference.pdf document found in the same folder noted above.

This project is also being added to our Idaho Lidar Web Viewer and you should see it there in a few days. We are also working with the ILC to update the metadata and reports links. We hope to have this completed also in the next week or two.

Sincerely,

Keith T. Weber
