Hello

I am happy to let you know this month that our lidar collection has grown once again. I recently completed adding three new project datasets in Valley County (Western Idaho). These are the Idaho Mine Site 2009, Midas Gold 2011, and Burnt Log Road 2013 projects. All these are now available using the Idaho Lidar Web Viewer from the ILC website and are currently being added to the Lidar image service right now. A big thank you goes out to Zack Lifton and Chris Dail for this contribution!

Secondly, I have opened registration for another FREE lidar workshop. This is my full-day workshop entitled "Working with Lidar in ArcGIS Pro". It is offered on Wednesday June 30th. Visit <https://giscenter.isu.edu/Workshops/index.htm> for more information and to register. Registrations will be accepted on a first come first serve basis with a max of 22 participants.

Questions? Just let me know.

Sincerely,

Keith T. Weber
