Hello GIS'ers,

Progress continues to be made on our lidar efforts here in Idaho. In particular we have **two new lidar datasets that have arrived** at ISU's GIS TREC. One covers areas in and around the Idaho National Laboratory and the other covers the Boise River area. These datasets are currently being reviewed and I anticipate they will be available early in June.

We are also still planning to offer a **Lidar workshop on Friday August 7th** If you would like to be one of the first to know about this workshop just email me and ask to be put on our workshop listserv (If you already get our GIS Workshops messages you are all set!).

*Sincerely,*

### Keith T. Weber
