Hello GIS'ers

Once again we have some great updates to share with you regarding lidar. First, we have updated our Proposed lidar collection areas web map (the wish list map) to show those areas that have already been collected. It came to our attention that some folks were making a wish for a lidar collection in an area where lidar had been already collected. Please visit https://giscenter.isu.edu/research/Techpg/FEMA_DOS/pdf/ProposedLidarCollectionAreaDocumentation.pdf or click the wish list map directions from the ILC home page at <https://www.idaholidar.org/>

When submitting your wish list area be sure to complete the attribute table and provide your contact information.

We have acquired several new lidar collections from NASA and are currently reviewing and preparing these data for inclusion on our spatial library. I hope to have these new data uploaded in the next few weeks.

Sincerely,

Keith T. Weber
