Hello

Unfortunately we are still waiting to receive new lidar data for the 2019 southern Idaho collection and I suspect it will be a feast or famine situation... meaning once the data starts coming in it will pour in and we will be flooded with new lidar (I am looking forward to that!).

To help you prepare to use Lidar data I am offering a free, full-day workshop on October 12th. Please visit <https://giscenter.isu.edu/Workshops/index.htm> for full-details and to register (there are just a few open seats remaining).

Sincerely,

Keith T. Weber
