

REGIONAL GEOGRAPHIC INITIATIVE (RGI) DATA DISCLAIMER

“The data and information available on the RGI Data Download page has been compiled by the GIS Training and Research Center at Idaho State University specifically for the Regional Geographic Initiative (RGI) Project. This information is intended to assist planners and policy makers with decisions concerning ground water quality, and to guide the development of planning policies. The data and information pertaining to, and contained within, the RGI database have not been completely verified or validated by the sources from which the data were received. However, all non-digital information entered into the database has been validated using materials supplied by the sources with the exception of those data supplied in digital format. The data and information available on this web page are not to be used for commercial or other applications without verification by an independent professional who is qualified to verify such data and information. The GIS Training and Research Center does not guarantee the accuracy or completeness of the data and information available, and will not be liable for any loss or injury resulting from reliance upon the data and information.”
